

27/08/2017 23:03

- ASSUMPTIONS:
- * Single day conference
 - * All sessions run concurrently and registration is exclusive
 - * All sessions are mapped
 - * User registers via his/her email which is unique
 - * Input is using CSV files (one for sessions & one for user registration)
 - * Currently session object cannot be deleted or total no of seats modified at runtime
 - * Singleton implementation of Conference object defined for later
